

Skilled worker for the production of fibre composite CFRP/GFRP components (m/f/d)

UBC Composites GmbH develops and produces solutions for technically complex lightweight solutions on land, at sea and in the air. UBC customers are technology leaders in the automotive, (motor) sports and aerospace industries. UBC Composites covers the entire value chain for lightweight solutions: from the product idea to design and conception, prototype / tool making and series production. In Murr (Baden-Württemberg, Germany), more than 100 employees work together with a strong partner network.

Your tasks:

Production of fibre composite CFRP/GFRP components according to layout * Processing of fibre composite CFRP/GFRP components / prototypes according to drawings * Bonding of individual parts and attachment of fasteners * Posting of order data

Your knowledge and skills:

You have completed a technical apprenticeship or are technically talented. You have technical understanding and good three-dimensional awareness. You are resilient, responsible and reliable. You enjoy working in a team, are flexible and willing to work shifts. You are looking forward to developing yourself.

That makes it special to work for us:

You have great opportunities for your personal development. We offer you attractive compensation for your performance. You have 30 days of vacation. You get preferential vacation time for school-age children. Your colleagues are competent and have strong implementation skills. You can expect a strong team spirit, exciting products and really cool projects. We maintain a familiar so-called "Duz" culture and, thanks to really flat hierarchies, take short and quick decisions. We have a dynamic working atmosphere with a lot of positive energy. Last but not least: we have very good highway connections.
